

Web Conferencing - Closed Captioning

The Web Conference platform supports a method for closed captioning. You will have to have a moderator typing what you wish to appear in the closed caption.

Ensure that in the Settings Tab the 'Show Closed Captioning if any' checkbox is ticked.

You can access this feature by clicking on tools and clicking on "Closed Caption".

The following box will appear which is where the person typing the closed caption will type the text. As the person is typing, the text will appear where it is set to appear in the configuration.

CC Closed Caption Input ✕
