

Web Conferencing - Video Player

You can upload a video file from your computer or record a video from your webcam. To get started go the Video Player tab and click the Start Video Player button.

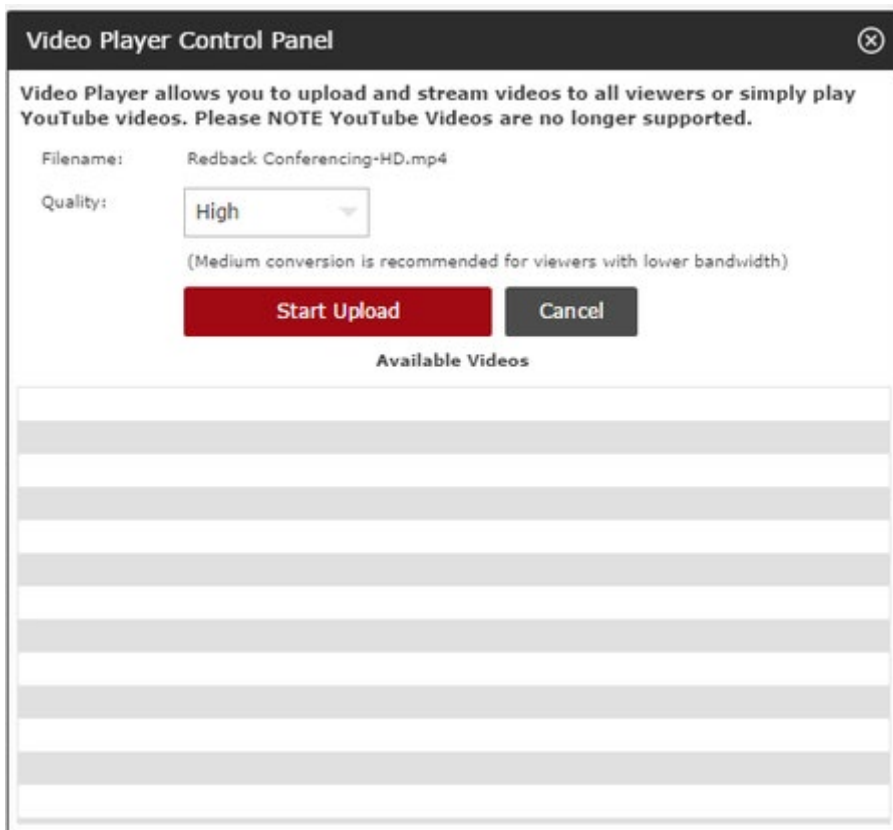

Accepted formats are: .avi, .flv, .mov, .mp4, .mpg, and .wmv

Start Video Player

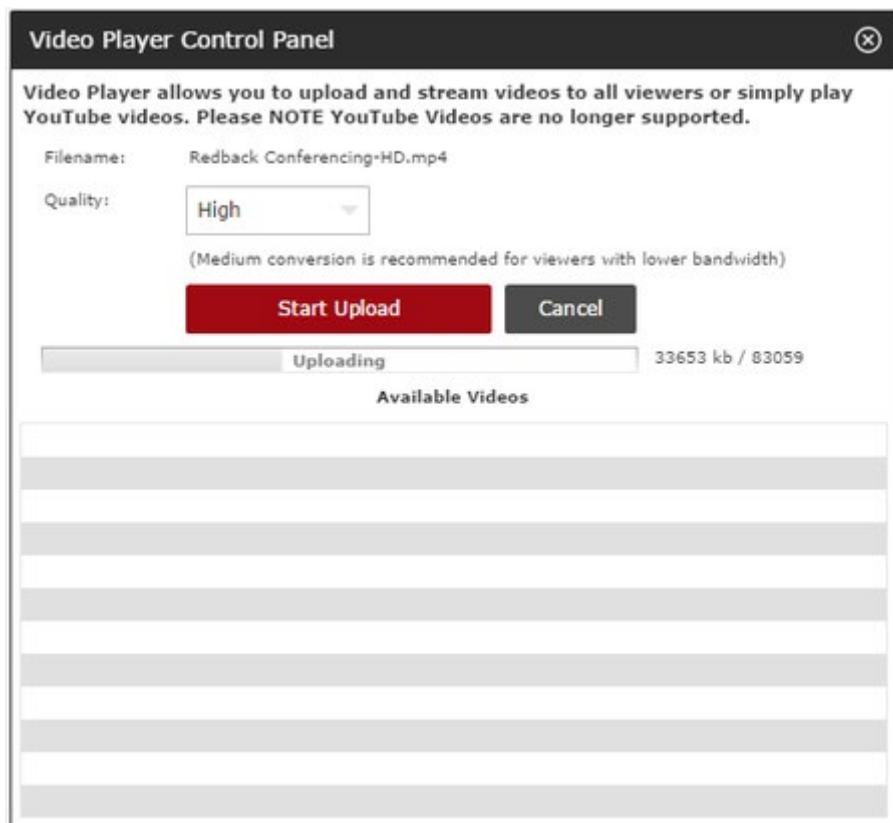

To add a video, simply click the + icon

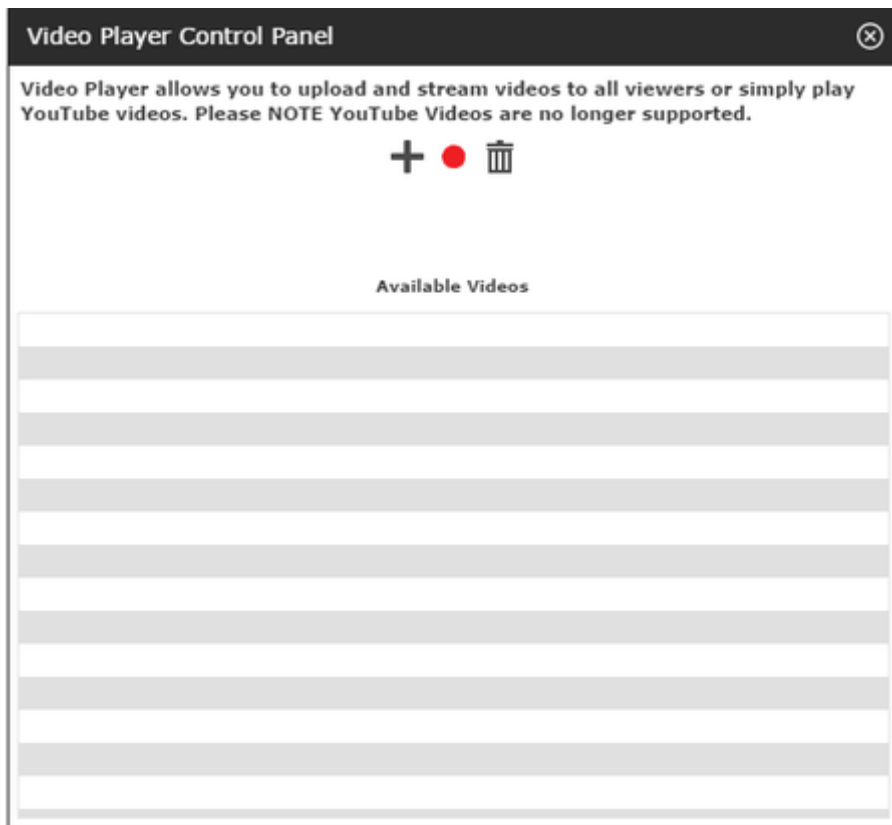

Then, browse your files and select the video you wish to upload. Once you select your quality, simply click on Start Upload.

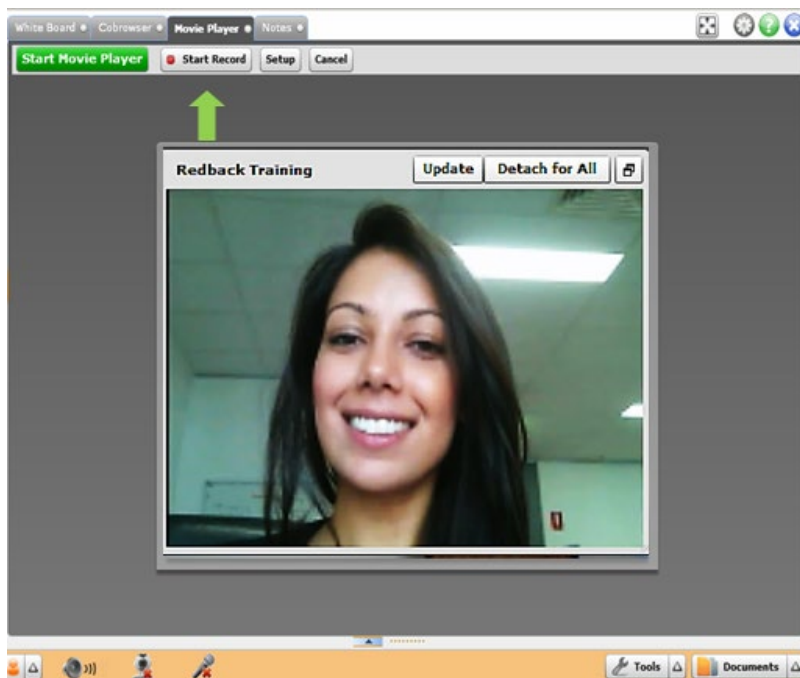

Your video will then begin to upload, and start converting.

You also have the ability to record a movie from an available webcam. Click the “Record” button and you will then be guided through the camera setup.

Click on the “start record” button to start recording from your webcam. Click the “stop” button when finished.

Once complete, you will have the ability to access all your saved videos within the Video Player tab.
